EXPERIENCE

Intact Financial Corporation

May 2026 - Aug 2026

Software Developer Intern

Montreal, Canada

- Developed Java/Angular features for Personal Lines Requests, used by 35,000+ agents and brokers across Canada
- Traced and fixed production defects across 5+ interdependent services in a large codebase shared with other teams
- Implemented configurable business-rule logic for auto/home insurance, meeting province-specific regulations

Amazon Web Services

Sept 2025 - Dec 2025

Software Development Engineer Intern

Berlin, Germany

- Developed an observability platform for the Redshift query planner serving 10,000+ production clusters worldwide
- Defined 12 critical planner health signals across multiple planner stages and query types in a distributed system
- Built SQL telemetry dashboards replacing manual log analysis, validating each signal against production behaviour

UKG

May 2025 - Aug 2025

Software Developer Intern

Montreal, Canada

- Delivered features across the full SDLC of the workforce scheduling platform in Java, used by 2,500+ organizations
- Diagnosed customer-reported defects in a Kubernetes microservices backend by replicating tenant environments
- Validated fixes with automated tests and Postman API checks, deploying through a CI/CD pipeline

Pomerleau

Apr 2024 - Sept 2024

Software Developer Intern

Montreal, Canada

- Designed an admin platform with a JavaScript frontend to manage 200+ active projects, streamlining operations
- Optimized SQL queries and EF Core database access patterns, achieving 2x faster data retrieval
- Refactored the C# backend and data-access logic, improving API response times by 25%

Pomerleau

May 2023 - Aug 2023

Software Developer Intern

Montreal, Canada

- Developed a dashboard using ASP.NET for 150+ project managers, improving performance and usability
- Implemented CI/CD pipelines, improving deployment speed and delivery efficiency by 50%
- Built and deployed the project dashboard on Microsoft Azure (App Service, Azure SQL, Blob Storage)

PROJECTS

Freshet

May 2026 - July 2026

- Built an autonomous LLM incident agent to find root-cause commits and post cited Slack briefs and postmortems
- Developed a streaming RAG system (Kafka, pgvector) with hybrid search, 356x fresher than an hourly batch
- Designed a reproducible eval suite, validating 0.92 recall@5 on 225 real incidents from public status feeds

Prosthetic Torque Prediction, Capstone

Jan 2026 - Mar 2026

- Built an LSTM (TensorFlow/Keras) to predict ankle torque from sEMG, reaching a pooled R-squared of 0.96
- Owned the machine learning track for prosthetic control, evaluated against system identification baselines
- Engineered an sEMG envelope pipeline (bandpass, rectify, low-pass, MVC-normalized) for leakage-free windowing

EDUCATION

McGill University

Montreal, Canada

Bachelor of Engineering, Software Engineering

Expected Dec 2026

- GPA: 3.71/4 (Alma Mater Scholarship Award)
- **Relevant Courses:** Data Structures and Algorithms, Object-Oriented Programming, Databases, Artificial Intelligence, Operating Systems, Signals and Networks

SKILLS

Programming Languages: Java, Python, C#, JavaScript, SQL, C, Bash

Cloud, Data & DevOps: AWS, Azure, Kafka, Kubernetes, Docker, PostgreSQL, Redshift, Linux/Unix, Jenkins

Frameworks & Libraries: Spring Boot, ASP.NET Core, React.js, Angular, Node.js, FastAPI, REST APIs

AI/ML: RAG, Vector Databases, TensorFlow, Keras, OpenAI API, Anthropic API, LLMs

Engineering: Microservices, Distributed Systems, CI/CD, Agile Methodologies, Jira, Confluence
