EDUCATION

McGill University

Montreal, CA

Bachelor of Software Engineering (B. Eng)

August 2022 - December 2026

- GPA: 3.76/4
- Recipient of the Alma Mater Scholarship for exceptional academic achievements

TECHNICAL SKILLS

Programming Languages: Java, C#, JavaScript, Python, SQL, C, Bash, Unix

Frameworks: ASP.NET, React.js, Vue.js, Node.js, Spring (RESTful Web Services), Scikit-Learn

Developer Tools: Microsoft Azure, Kubernetes, Jenkins, Google Cloud, Docker, SSMS, PostgreSQL, Git, Terminal

Languages: English (Fluent), French (Fluent), Bulgarian (Fluent), Spanish (Intermediate)

WORK EXPERIENCE

Amazon Web Services

September 2025 - December 2025

Software Development Engineer Intern

Berlin, DE

- Architected an end-to-end observability platform for the Redshift query planner, increasing monitoring coverage
- Established comprehensive planner monitoring by defining critical health signals to power automated alerting
- Developed diagnostic dashboards with SQL to expose new telemetry, reducing MTTR and manual log investigation
- Enabled proactive detection of performance regressions, allowing resolution of issues before customer impact

UKG

May 2025 - August 2025

Software Developer Intern

Montreal, CA

- Contributed to full-cycle development on the WFM scheduling platform, directly impacting 2,500 organizations
- Resolved 4 critical production defects in Java on Kubernetes, restoring core scheduling functionality
- Engineered robust Java validation logic to resolve data integrity issues
- Validated fixes with a suite of automated tests and Postman API checks, deploying through a CI/CD pipeline

Pomerleau

April 2024 - September 2024

Software Developer Intern

Montreal, CA

- Designed an Admin platform to manage over 200 active projects, streamlining operations and enhancing efficiency
- Developed and optimized the backend with C#, reducing delay times and improving response speeds by 25%
- Refined the frontend with JavaScript, enhancing usability and creating a more reliable, user-friendly interface
- Collaborated within an Agile framework with cross-functional teams, including QA and product management

Pomerleau

May 2023 - August 2023

Software Developer Intern

Montreal, CA

- Developed a Visual Dashboard app using ASP.NET, boosting performance for over 150 project managers
- Leveraged Microsoft Azure cloud services to facilitate scalable solutions and enhance application functionality
- Implemented and integrated CI/CD pipelines, streamlining workflows and enabling faster delivery by 50%
- Optimized data queries and managed database interactions via SQL and EF Core, achieving 2x faster data fetching

PROJECTS

GitFit

January 2024 - May 2024

- Developed a Java fitness app allowing users to create accounts, register for classes and manage session registrations
- Set up a local PostgreSQL database and Spring Boot for the backend, ensuring efficient data and API management
- Implemented dynamic and responsive frontend components using Vue.js, enhancing user experience and interaction
- Integrated secure user authentication and authorization, such as password encryption and role-based access control

QuestionForger

November 2023

- Developed a full-stack adaptive learning platform using React and SQL, gamifying difficult course practice
- Engineered dynamic question logic and a user-friendly interface to enhance student engagement
